

Don't Forget

...

A subject tracker and note taking application
By Jayme Moehle

Technologies Used

- ❑ Python
- ❑ Django and REST API
- ❑ Vue.js
- ❑ Bootstrap
- ❑ HTML
- ❑ CSS
- ❑ AWS
- ❑ Amazon Alexa

Upon Completion

- ❑ Personal subject tracker and everyday note taker that can be used on mobile or desktop
- ❑ User login: user will be able to create an account for private note keeping
- ❑ Edit notes: user will be able to save, update, and delete their entries
- ❑ Cloud notes: user will be able to view the application from mobile or desktop using AWS.
- ❑ Amazon Alexa: integration with Amazon Alexa for voice-to-text integration

Thus Far

- ❑ Subject portion of application completed
- ❑ User registration and login working
- ❑ User able to enter a subject, add entries, and edit the entries
- ❑ Bootstrap and CSS styling applied

Looking Ahead

- ❑ Note taking portion will be an SPA using Vue.js for the front-end framework
- ❑ Host on Amazon Web Services
- ❑ The final piece: create an Amazon Alexa skill for the voice-to-text feature
